EDUCATION

Arizona State University (4.0 GPA)

Tempe, AZ

Bachelor of Science in Computer Science (Software Engineering), Minor in Entrepreneurship

Aug 2022 - May 2026

EXPERIENCE

Software Engineering Intern (Machine Learning)

Jul 2024 - Present

Geometric Media Lab

Tempe, AZ

- **Developed and Debugged** a hybrid ML pipeline: Combined k-means clustering with a supervised neural network for gunshot detection, boosting **accuracy from 20% to 80%** on **10+ hours** of audio data processed via Librosa and iterative model refinement.
- **Optimized edge deployment:** Tailored the pipeline for Raspberry Pi by integrating hardware-specific adjustments and a custom microphone setup, ensuring real-time performance in resource-constrained forest environments.
- Improved software quality and reliability by Implementing a dynamic feedback loop to continuously refine predictions and improve noise differentiation, securing scalable analysis under diverse conditions.

Software Engineering Intern (Machine Learning)

Jan 2023 – Dec 2024 *Tempe, AZ*

ASU Biodesign Institute

- **Designed and Implemented** an end-to-end data pipeline: Automated DNA-PAINT image analysis by integrating k-means clustering and custom tracking algorithms, slashing **processing time from 4 hours to 10–30 minutes** per image.
- Advanced research capabilities: Delivered granular movement data and actionable metrics, transforming traditional nanotech workflows into ML-driven, high-impact research tools.

Software Engineer Aug 2024 – Present

Mesa Historical Museum (EPICS)

Tempe, AZ

- Built and Tested an immersive digital experience: Developed an interactive website using React and Three.js, increasing visitor engagement by 20% and offering an engaging digital tour of museum collections.
- Collaborated with cross-functional teams: Directed a 7-member team to implement scalable content management and ensure sub-second website response times, optimizing the digital visitor experience.

Software Engineer

Jan 2024 - Oct 2024

Software Developers Association (SoDA)

- Tempe, AZ
- Automated operational workflows: Reduced test case upload time by 98% using a Selenium-based scraper for 200+ files, streamlining annual
 code challenge processes.
- Optimized membership systems: Developed a Flask-Next.js application that boosted operational efficiency by 50% and enhanced engagement for 600+ active members.

LEADERSHIP EXPERIENCE

- Led teams to win 4 hackathons sponsored by Honeywell, DAASH, and ASU, guiding 15+ developers to competition success
- Rose from Intern to **Technical Director** at SoDA, managing 12 engineers to deliver technical workshops for 600+ club members

PROJECTS

Amano - Emotion-Based Song Recommendation System | Flask, Spotify API, OpenAI API, AWS EC2

- **Designed, Implemented and Tested** Spotify's song recommendation system by developing a backend using **Flask hosted on AWS EC2** that integrates with the **Spotify API** to provide personalized song suggestions using **Reinforcement Learning**.
- Enhanced user experience with a real-time ChatGPT LLM chatbot that analyzes mood and sends data to the reinforcement model for dynamic song recommendations, functioning like a personal DJ.

Mine Alliance - Fullstack Sustainable Mining Website | React, Flask, SQLAlchemy, AWS, OpenAI GPT-4, TailwindCSS

- Reduced environmental assessment response times by 40% by leading the development of a fullstack platform that integrated ChatGPT-4 API
 for mining site impact assessments.
- Utilized SQLAlchemy, Flask, AWS EC2, and geospatial mapping with Leaflet, resulting in increased stakeholder engagement.

Market Anomaly Detection (MAD) | Python, Streamlit, Scikit-learn, GEMINI, Jupyter Notebook

- **Developed an anomaly detection system** to identify potential financial market crashes, utilizing **Streamlit** for an interactive user interface and **Scikit-learn** for model training and tuning.
- Enabled user-driven customization and improved performance with features like GEMINI-powered chatbot, automated model tuning, and support for supervised and unsupervised learning pipelines.

TECHNICAL SKILLS

Languages: Python, Go, C/C++, Java, JavaScript, TypeScript, C#, SQL, HTML, CSS, Flutter

Frameworks & Libraries: Flask, Django, React, TensorFlow, PyTorch, scikit-learn, OpenCV, three.js, pandas, numpy

Tools & Environments: Streamlit, Docker, AWS, Linux, Git, GitHub, Selenium, Google Colab, Jupyter Notebooks

Machine Learning & Al: Neural Networks, GEMINI API, Deep Learning, Reinforcement Learning, Unsupervised Learning
