EDUCATION

Arizona State University (4.0 GPA)

Tempe, AZ

Bachelor of Science in Computer Science (Software Engineering)

Aug 2022 – May 2026

EXPERIENCE

Software Engineering Intern (Machine Learning)

Jul 2024 - Present

Geometric Media Lab

Tempe, AZ

- **Developed a ML pipeline** using *Python* for gunshot detection, boosting **accuracy from 20% to 80%** on **10+ hours** of audio data through model refinement.
- **Optimized edge deployment** by integrating hardware-specific adjustments and a custom microphone setup, ensuring real-time performance in resource-constrained environments.
- Implemented a dynamic feedback loop to continuously refine predictions and improve noise differentiation, securing scalable analysis under diverse conditions.

Software Engineering Intern

Jan 2023 – Dec 2024 *Tempe, AZ*

ASU Biodesign Institute

- **Developed an end-to-end data pipeline:** Automated image analysis by integrating k-means clustering and custom tracking algorithms, slashing **processing time from 4 hours to 10–30 minutes** per image.
- Advanced research capabilities: Delivered granular movement data and actionable metrics, transforming traditional nanotech workflows into ML-driven, high-impact research tools.

Software Engineer Aug 2024 – Present

Mesa Historical Museum (EPICS)

Tempe, AZ

- Developed an interactive website using JavaScript and React, increasing visitor engagement by 20% and offering an engaging digital tour of
 museum collections.
- **Directed a 7-member team** to implement scalable content management and ensure sub-second website response times, optimizing the digital visitor experience.

visitor experience.

Software Engineer

Jan 2024 – Oc

Software Developers Association (SoDA)

Jan 2024 – Oct 2024 *Tempe, AZ*

- Automated operational workflows: Reduced test case upload time by 98% using a Selenium-based scraper for 200+ files, streamlining processes.
- Optimized membership systems: Developed a Python application that boosted operational efficiency by 50% and enhanced engagement for 600+ active members.

LEADERSHIP EXPERIENCE

- Led teams to win 4 hackathons, guiding 15+ developers to competition success
- Rose from Intern to **Technical Director** at SoDA, managing 12 engineers to deliver technical workshops for 600+ club members

PROJECTS

Emotion-Based Song Recommendation System | Flask, Spotify API, OpenAI API, AWS EC2

- Developed a backend using Flask that integrates with the Spotify API to provide personalized song suggestions using Reinforcement Learning.
- **Enhanced user experience** with a real-time **ChatGPT LLM chatbot** that analyzes mood and sends data to the reinforcement model for dynamic song recommendations, functioning like a personal DJ.

Fullstack Sustainable Mining Website | React, Flask, SQLAlchemy, AWS, OpenAI GPT-4, TailwindCSS

- Reduced environmental assessment response times by 40% by leading the development of a fullstack platform that integrated ChatGPT-4 API for mining site impact assessments.
- Utilized SQLAlchemy, Flask, AWS EC2, and geospatial mapping, resulting in increased stakeholder engagement.

Market Anomaly Detection | Python, Streamlit, Scikit-learn, GEMINI, Jupyter Notebook

- Developed an anomaly detection system to identify potential financial market crashes, utilizing **Streamlit** for an interactive user interface and **Scikit-learn** for model training and tuning.
- Enabled user-driven customization and improved performance with features like GEMINI-powered chatbot, automated model tuning, and support for supervised and unsupervised learning pipelines.

TECHNICAL SKILLS

Languages: Python, C/C++, Java, JavaScript, TypeScript, C#, SQL, HTML, CSS

Frameworks & Libraries: Flask, Django, React, TensorFlow, PyTorch, scikit-learn, OpenCV, three.js, pandas, numpy

Tools & Environments: Streamlit, Docker, AWS, Linux, Git, GitHub, Selenium, Google Colab, Jupyter Notebooks

Concepts: Object oriented programming, data structures, software engineering techniques, quality assurance, parallel programming, databases, networking
